

SUMMARY

I tend to keep myself up to date with important changes in the Android world and regularly look into new ways of solving things. Always looking for new challenges and opportunities.

- Passion for learning, research on new technologies. Interest in programming.
- Love freedom and liberty. There is passion and inspiration in sharing, transmitting knowledge.
- Familiar with various developer tools (Android Studio, Gradle, debugging, profiling, git).
- Strong background in Java programming
- Familiar with source control tools (git, SVN).
- Experience with MVP architecture.
- Experience with RxJava, RxAndroid.
- Firm understanding of design patterns (at least singleton, abstract factory, template method).
- I tend to keep myself up to date with important changes in the Android world and regularly look into new ways of solving things.
- Always looking for new challenges and opportunities.

Good skills:

- Android development
 - Clean Architecture
 - Data storage: Realm, SQLite, SharedPreferences, Internal/External memory
 - Sensors, Location and Maps, Geofences, beacons
 - Understanding and using guidelines; Material Design; common UI/UX patterns; using support libraries
 - Creating applications for multiple screen resolutions/sizes
 - Firebase (database, authentication, analytics, notifications, remote config)
 - Integrations with social networks (facebook, google, twitter)
 - Dealing with REST API
 - Signing and publishing applications. Successfully implemented on Google Play
 - Open source libraries: Dagger 2, Retrofit 2, ButterKnife, EventBus, Timber/Hugo, Crashlytics
- Basic skills:
- C# – desktop applications, tools
 - PHP – simple back-ends, mostly for pet projects.
 - HTML, CSS, Javascript

EXPERIENCES

Android Developer Techub Ltd

04/2017 - 03/2018

Completed two projects of the company: VLD Furniture, Jockey.
Develop projects with the following technologies:

- Google Maps Api
- Firebase
- Call API: Retrofit
- MVP
- Realm ORM
- LiveData

Android Developer

03/2018 - 06/2018

Innotech | Innovative Technology

- Optimize the application to improve performance and enhance the scalability of the product.
- Participate in the design team's code and reviews.
- Develop applications related to investment securities.

Android Developer

06/2018 - Present

ESMAC Technology

- Completed two projects of the company: Origin, Greas.
Develop projects with the following technologies:

- Room Database
- Call API: Retrofit
- MVP
- Realm ORM
- LiveData
- SharedPreferences
- Firebase
- RxJava2
- Dagger2

Achievements :
